

SmartClinic®

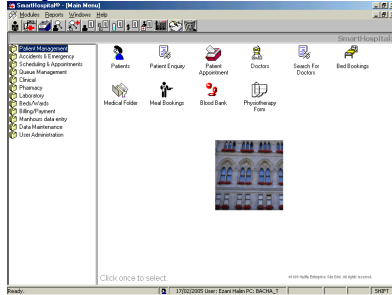

Clinic Management Software

Version 4.0

for Microsoft™ Windows™

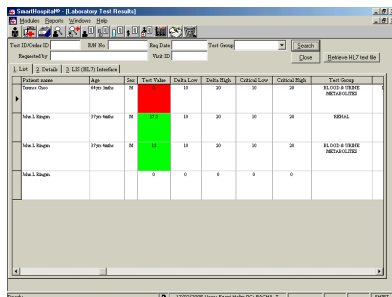

“Clinic management for the new millenium!”

Why SmartClinic® ?

SmartClinic® is a Windows-based clinic management software solution for all kinds of clinics. Modules include:-

- MYKAD Patient Registration
- Consultation/Scribing
- Pharmacy
- Billing and Payment

MYKAD Patient Registration

SmartClinic® is able to register your patients with MYKAD. No keying in is necessary!

Queue System with Waiting Time

SmartClinic® comes with an inbuilt Queue System which shows in real time how long each patient is waiting and alerts you if they have waited too long (can be configured)

Consultation

SmartClinic® allows you to record Vital Signs such as Height, Weight, BMI, Blood Pressure, etc, and then record your Observation and

Diagnosis (ICD10). You can then prescribe your medication and treatment plan.

Scribing

Scribing is automatically enabled in SmartClinic® which allows you to quickly note down patient condition so that your patients do not have to wait. You can breeze through your consultation sessions and have your backoffice staff actually keyin the data for you later!

Pharmacy

SmartClinic® comes with complete drugs database so you or your staff do not have to keyin again. You only change the pricing for your clinic.

Billing and Payment

Billing and Payment is a breeze and SmartClinic® automatically prints out an Official Receipt for you!

Wide Range of Reports

SmartClinic® come with a wide range of reports for your clinic.
