

SunpacPlus© Library Manager

Library management software

Version 4.0

for Microsoft™ Windows

“Library management with peace of mind!”

Why Should I Purchase

SunpacPlus© Library Manager?

SunpacPlus© Library Manager Version 4.0 is a full-scale Windows-based library software for small and large libraries alike. Many of today's modern library features are included. A short summary of features can be found below :-

Supports Dewey and Library of Congress coding formats

SunpacPlus© Library Manager Supports Dewey and Library of Congress (LOC) coding formats

Bar-coding functionalities

Users are able to print bar code labels to be pasted on books and media as well as member cards.

Able to manage multiple media

Able to manage multiple media types such as CD-ROMs, journals, magazines and attachments which comes together with books as well as useful Internet URL websites.

Scalable to larger libraries with back office accounting system

For larger library systems, SunpacPlus© Library Manager is able to interface with the separate SunpacPlus© Accounting and Purchasing modules to form a complete financial and purchasing library system.

Supports multi-branch and distributed libraries

SunpacPlus© Library Manager is capable of supporting multiple branches of the same library organization. You can also have inter-library book borrowing and lending.

Flexible fine management

SunpacPlus© Library Manager also has a flexible fine management system that allows you to set different fines for different user groups. Fines can also be waived making the SunpacPlus© Library Manager suitable for company libraries or club / departmental libraries.

Store Media Clips and Play Them

You can store media clips and play them.

Lost books, lost cards & blacklisted members
